Education

Concordia (2001)

Certificate in Graphical applications in desktop publishing

A Little About Me...

As a product designer with extensive experience in crafting user-centric and responsive designs, I have always focused on the alignment of user needs, business objectives, and brand consistency. Having a background in graphic design, along with my expertise in developing software, has allowed me to sucessfully create cohesive user journeys and fleshed out brand identities for several different product over my career.

Where I Have Worked

Sofdesk / Enphase Energy (2019-2024)
UI/UX Designer

Worked on the internal design team to develop a new branding and user experience for Solargraf software, resulting in a completely new and refined brand identity and user experience. I maintained regular communication with users and product owners to continuously refine and enhance the software's usability.

LVL Studio (2019)
UX Designer

Collaborated directly with TELUS to establish product features for Mediaroom, encompassing both iOS and Android platforms. This collaboration included the definition of user acceptance criteria to the development handoff for Pik and OptikTV video platforms.

NAKISA (2016 - 2018)
UI/UX Designer

Defined the base design for all Nakisa software. Led UI/UX efforts to create and implement component-driven development. Standardized all UI development through the creation of branding style guides.

Ericsson (2014)
UI/UX Designer

Collaborated with clients to design fully responsive, accessible, cross-browser templates for websites, e-commerce platforms, mobile applications, and digital marketing campaigns.

Zero Knowledge / Radialpoint (2002-2013)
UI/UX Designer, Web Integrator

Collaborated with external design teams and product stakeholders to develop user-centric workflows, wireframes, designs, and style guides, ensuring adherence to internal UI development standards.
