Concordia (2001)

Certificate in Graphical applications in desktop publishing

A LITTLE ABOUT ME

I am a designer with over a decade of experience specializing in both web and interface design. From the outset, I realized I had an affinity for developing user experiences and putting together functional user flows. I help clients design and develop user-friendly, responsive solutions.

WHERE I HAVE WORKED

LVL Studio (2019)

UX Designer

Worked directly with TELUS to define user-journeys , pain points, user-flows and wireframes for Pik and OptikTV video platforms. Detailed product features for Mediaroom, iOS and Android from initial definition of user acceptance criteria to development handoff.

NAKISA (2016 - 2018)

UI/UX Designer

Defined base design for all Nakisa software. Led UI/UX efforts to create and implement component driven development. Standardized all UI development through creation of branding style guides.

Ericsson (2014)

UI/UX Designer

Worked with customers reviewing project functional specifications creating fully responsive, accessible, cross browser templates. I was responsible for the creation and implementation of websites, e-commerce platforms, mobile apps, and digital marketing campaigns.

Zero Knowledge / Radialpoint (2002-2013)

UI/UX Designer, Web Integrator

Worked with multiple external design teams to create scalable, responsive, user-friendly layouts. Updated and maintained internal UI development processes. Interfaced with product stakeholders to create user-flows, wireframes, designs and styleguides.
